## TECHNICAL DATA SHEET

## **QGel 314 High Tack Silicone Gel**

Description	Property	Test	Value
QGels are addition-cure clear, soft, moderately cross-linked	Toperty	Method	Tulue .
silicone polymer. Silicone gels provide protection from moisture,	Uncured Product		
vibration, thermal, or mechanical shock.	Cure Profile		30 mins at 150°C, 45 mins at
Key Features			100°C, 60 mins at 80°C
<ul> <li>Convenient 10:1 mixing ratio for use in automatic dispensing aquipment or band mixing</li> </ul>	Cure Type		Addition
<ul><li>equipment or hand mixing</li><li>High surface tack</li></ul>	Density A	BS ISO 2781	1.01
High strength tough gel	-		
Use and Cure Information	Density B	BS ISO 2781	0.97
Important	Gel Time at 25°C/77°F		2 hr
In order to achieve optimum performance, the same lot number	Mix Ratio By Weight		10:1
of the A and B components should be used. Mixed lots may not	Rheology		Gel
obtain the performance criteria listed on the TDS or Certificate of	Viscosity A	Brookfield	65,000 cP
Analysis.	Viscosity B	Brookfield	
The "A" part of QGels contain the platinum catalyst; great care should be taken when using automated dispensing equipment to			_,
not cross-contaminate systems.	Cured Product		
Mixing	Color		Translucent
Both the "A" and "B" parts should be well stirred to ensure the material is uniform. QGels should be mixed by weight. Once the	Hardness Shore 00	ASTM D 2240-95	25
components are mixed, the curing process begins. The gel time	Max Working Temp		204 °C / 399 °F
of the mixed material is listed under the typical properties. Fast	Min Working Temp		-55 °C / -67 °F
curing gels should be dispensed utilizing automated mix and	5 1		
dispensing equipment. In order to achieve optimum performance, the same "A" and "B" side lot numbers should be used.	Storage		
De-Aeration	Max Storage Temperature		38 °C / 100 °F
Air trapped during mixing should be removed to eliminate voids in	Shelf Life		24 mths

Air trapped during mixing should be removed to eliminate voids in

the cured product. Vacuum de-airing may be necessary to completely remove all entrapped air bubbles. To ensure proper de-airing, subject the mixed material to 29 inches of mercury.

## Storage and Shelf-life

This product is best when used within 24 months from the date of manufacture, See product label and/or the CoA for specific "use by date". Product should be stored in its original, unopened container in an environment that does not exceed 38C (100F)

Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case, the properties required for the intended use should be checked for quality assurance reasons.
