

HANSA CARE 2229

Compound based on a modified organosiloxane as an ingredient for Home and Car Care.

Description

The permanently cationic charge makes these polymers excellently suited for a use as spray wax or rinse-off wax. Moreover, silicone quats may work as boosters for other substances which can then be distributed more easily on the surface.

Key Features

- Sheeting effect
- Drying effect
- Improves Gloss and Colour depth
- Smoothness

Key Applications

- Car Shampoos
- Polishes
- Cleaners

Application

HANSA CARE 2229 is an additive for shampoos, cleaners and polishes to improve the sheeting effect by rinsing with water. Besides this hydrophobic effect, the silicone leaves a smart shine and deep colour after drying. The product may improve the surface smoothness and slip.

Health & Safety

Safety Data Sheets available on request.

Packaging

Drums and bulk containers. Please contact our sales department for more information.
