

## HANSA AC 5610 High performing antifoam for agricultural formulations based on polyethermodified siloxane.

### Description

Silicone antifoam for industrial agriculture applications.

### Key Features

- Low polarity.
- Good stability to water hardeners.
- Ready to use.
- Stable at pH 2-11

### Key Applications

- Agricultural adjuvant, antifoam

### Application

High performing antifoam for agricultural formulations based on polyethermodified siloxane. Low polarity.

HANSA AC 5610 is a ready to use antifoam and can be easily diluted with water. The product can be used directly as a spray tank additive to control foaming during processing and application. The product also suitable for formulating antifoam products by diluting with water and stabilizing with thickeners. HANSA AC 5610 can be also used as a process additive during productions of chemicals for agriculture.

HANSA AC 5610 dosage recommendation:

ready to use at	0.01-0.30 %.
For antifoams formulations:	5 - 20 %.
As process additive:	0.01-0.30 %.
