

CHT-BeauSil™ FLUID 8121 EM Nonionic ultra-high viscosity silicone emulsion

Description

This product is a personal care nonionic polydimethylsiloxane emulsion.

Key Features

- Small particle size of an extremely high viscosity polymer
- Compatible with nonionic, cationic, and anionic surfactant systems
- Imparts rich feel to skin care formulations
- Wash off resistant and film forming

Key Applications

- Skin creams
- Shower gel
- Facial cleansers
- Shampoo and conditioner

Application

CHT-BeauSil™ FLUID 8121 EM is a unique nonionic emulsion of ultra-high viscosity silicone polymer. CHT-BeauSil™ FLUID 8121 EM has low cyclic content.

Use and Cure Information

To optimize the dispersion of this emulsion into the final formulation, it is recommended to add it slowly at the end of the procedure at a temperature below 40 °C (104 °F) with continuous mixing or stirring.

Health & Safety

Read product and safety data sheets before handling this product for physical and health hazard information. The safety data sheet is available from your CHT representative.

Limitations

This product is not intended for pharmaceutical use.
