

CHT-BeauSil™ AMO 8950 EM Cationic emulsion of amodimethicone for Personal Care.

Description

Amodimethicones are functionalized silicones with nitrogen groups. These modification improves the deposite and the affinity to the hair. Amodimethicones are showing excellent combing and a good gloss on hair. These silicone polymers are ideal for all kind of hair care application were best performance is needed.

Key Features

- Improves dry and wet combing
- Color and heat protection
- Softness
- Conditioning

Key Applications

- Conditioner
- Shampoo
- Hair Treatment

Application

CHT-BeauSil™ AMO 8950 EM is a 50% solids cationic emulsion of an amine-functional silicone polymer. The amodimethicone actives are delivered in an opaque, low viscosity liquid with a neutral pH. This emulsion was developed as a conditioning additive for hair care products such as shampoos, conditioners, styling aids, and hair colorants. This product has an industry leading particle size resulting in increased stability and performance.
