

HANSA LPW 723

Macroemulsion of a modified siloxane to be used for manufacturing leather

Description

This product can be used in leather top coat to achieve a very peculiar touch. Other properties can be obtained according to the specific application.

Key Features

- Fatty, full and warm touch
- Improves the wet rubbing fastness
- Improves the gloss
- Natural appearance on the final article

Key Applications

- Nappa leather
- Garment leather
- Shoe upper leather

Application

HANSA® LPW 723 is a macroemulsion of an aminofunctional siloxane to be applied as a handle modifier or as water-repellent additive. It can be used in cationic water-based top coats or as final touch modifier. The product is suitable for giving a fatty, very full and warm touch in addition to a natural appearance on the final article.

HANSA® LPW 723 improves the wet rubbing fastness and the gloss.

HANSA® LPW 723 can be diluted with water to any ratio; however, the optimal application amount must be adapted to the desired effect.

Use and Cure Information

In waterbased top coat.

Health & Safety

Safety Data Sheets on request available.

Packaging
